

The Design Rules.

A fluid design language between the front-mobile et the front-web with a few design choices were chosen since the beginning of the project. A purple design with light blue highlights and where ever possible a curved and minimalist design for the icons , text , logo and buttons.

With feed back from previous projects completed during our TEK3 curriculum we wanted to avoid a monochrome look that didn't grab the attention of the user and kept them engaged but we didn't want to go over board. Here is the hex codes we stuck to for the majority of the project with the occasional deviations using the default colors given by the Material-Ui dependency.

Our color scheme includes these hex codes.

Primary color = #6F35A5 (Purple)

Primary light color = #F1E6FF (Light Purple)

Secondary color = #78C4D4 (Teal color)

Secondary light color = #F6F6F6 (Light Grey Color)

For the front-mobile you can find the color scheme here.

```
constants.dart X
front-flutter > area > lib > constants.dart > ...
1  import 'package:flutter/material.dart';
2
3  const kPrimaryColor = Color(0xFF6F35A5);
4  const kPrimaryLightColor = Color(0xFFF1E6FF);
5  const kSecondaryColor = Color(0xFF78C4D4);
6  const kLightGreyColor = Color(0xFFF6F6F6);
7
```

For the front-web you can find the color scheme at the top of each file in the UseStyles component.

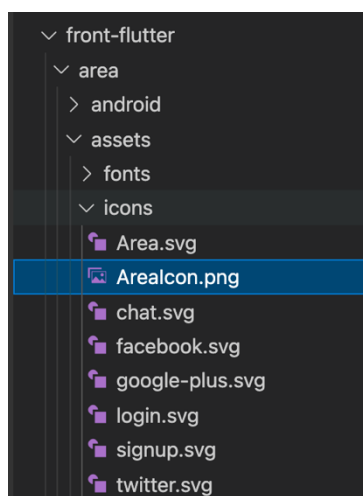

Design rules

Our Logo.

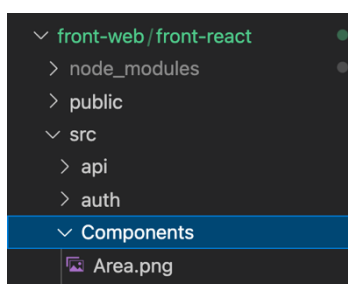

Our logo was made using the adobe suite and convert to a .png placed throughout the project to give the website a unique identity.

To find the logo on the front-mobile.

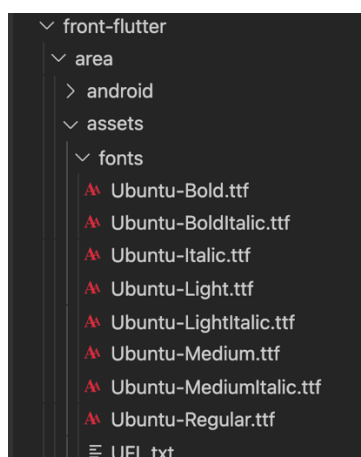

To find the logo on the front-web.

Fonts

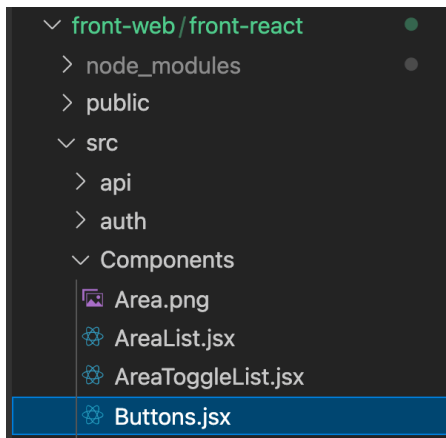

Following our minimalist design language we stuck to simple fonts. The front-mobile uses these fonts in the image below throughout the project. While the front-web uses the default font given with Material-ui and no folder is necessary.

Design rules

Button Design elements and other components can be found in the components folder for both the front-web (More info and images of designs can be found in the documentation for the front-web) and front-mobile.
